BACKGROUND, PURPOSE AND SCOPE

Background & Purpose:

Polk County Parks and Natural Resources (PNR) is seeking professional engineering services for technical, engineering, and scientific services to assist with the design, permitting and construction to repair damage to the Circle B Bar Reserve following Hurricane Milton. The goal of the County is to restore the site to pre-storm conditions or better. This includes repairs to the berms built in the early 1900’s, along the existing trail system.

Restoring the site to Pre-Hurricane Milton conditions will ensure the continued improvements to water quality by allowing the Banana Creek Marsh system of Circle B Bar Reserve to function properly. In addition, the scope includes creating a design that

could enhance the function of the wetland treatment system, and the treatment of water into Lake Hancock, which flows into the Peace River.

All deliverables must be in a form suitable for bidding and construction including digital copies of all data and deliverables, in both PDF and ArcGIS shapefiles when appropriate, to include but not limited to the professional engineering services further detailed within the scope of services for this project. The expected result is to have fully developed design, and construction plans with all permitting in place to construct said needs and a set of bid packages for construction services that meets all Federal requirements.

SCOPE OF SERVICES

Professional engineering services are to include, but are not limited to, planning, design, environmental sciences, environmental permitting, right-of-way, surveying and mapping (including bathymetry), value engineering, geotechnical work, construction management, construction inspection, historical, archaeological, wetland and ecosystem operations, wetland assessments, stormwater discharge systems operations, hazardous material operations, pollutant removal analysis, evaluation of drainage or flooding problems, design and permitting of cost efficient solutions, drainage calculations and/or modeling, geotechnical analyses, geographic information system (GIS) mapping and analysis, data analysis, scientific investigations, identifying, describing, and obtaining necessary easements and/or land acquisition.

The project may include local and regional flood studies, stormwater management, wetland mitigation, wetland creation and restoration, design, acquisition and construction of water quality treatment structures, park improvements and wetlands, watershed evaluations, recommendation and construction of water quality improvement solutions, water quality and quantity issues/assessments of lakes and waterways, restoration of natural lands.

The following is a list of typical services that may be requested under this agreement. The list is not intended to be all-inclusive:

1. Complete drainage/flood studies, evaluations, inspection or monitoring for various roadway and natural areas such as storm water management facilities, environmental mitigation facilities, streams and waterways, and residential communities.
2. Design and preparation of construction plans, permits, specifications and bid documents for various projects such as roadway drainage, water quality and storm water system retrofits, mitigation sites, restoration of natural areas, utility improvements/adjustments, and stormwater Best Management Practices. Examples of typical services include analysis, design and permitting of drainage and water quality improvements, surveying and mapping, geotechnical investigations and analysis, environmental investigations and analysis, cost estimate, utility accommodation, and railroad coordination.
3. Conduct field data collection to supplement or update existing data. Data will be gathered to establish current conditions but also to try to document the pre-hurricane conditions of the site. Work includes the verification of surface water flow patterns, flow path cross sections and invert elevations as necessary for the model parameters and the

development of proposed improvement plans. Coordinate with the survey subconsultant to collect ground truthing data to refine Lidar survey data. Specific survey data of the berms and drainage structures in question will be gathered to understand the profile of the berms, water flow, and general condition of the project site. Survey tasks also include structure confirmation, as necessary and a Special Purpose Survey to establish a partial Boundary Survey where ownership may be in question. This will not include a complete Boundary Survey of the entire Circle B Bar property. Coordinate with subconsultant Wetland Solutions on the collection of wetland flags or other information they may establish so that the data may be included in the survey data. Geotechnical data will be gathered as required to support the proposed berm repairs and structure repairs. Collaborate with geotechnical subconsultant for all augers and borings.

- UNACCEPTABLE (0.0):

The Proposer failed to provide any information for a given criteria, provided information that could not be understood, or did not provide the information for a given category as requested.

After a Selection Committee member has determined the description applicable for each evaluation criterion, the total points available for such criterion shall be multiplied by the factor associated with the applicable description to produce the number of points allocated for that evaluation criterion. For example, a Selection Committee member classifies the "Experience and Expertise" criterion (which shall be worth 25 points for the purpose of this example) as "Very Good" (which is a description factor multiplier of 0.8). The points that Selection Committee member allocated for that evaluation criterion would be 20, calculated as follows: 25 available points x 0.8 applicable description factor multiplier = 20 points.

A Selection Committee member's total score for each Proposal shall equal the sum of the total points allocated for each evaluation criteria.

When all Selection Committee members have completed their Proposal evaluations, the individual Selection Committee member's total scores for each Proposal will be added together to produce a final score for each Proposal.

Procurement will confirm the calculations for the final score for each Proposal. Then, Procurement shall publish a rank-ordered listing of the Proposals to the Selection Committee with the Proposal receiving the highest point as the highest-ranked Proposal.

In accordance with Section 287.055(4)(a), Florida Statutes, if there are three (3) or more Proposers in Elevation Level 2, the Selection Committee will elevate no fewer than the three highest scored of such Proposers to Elevation Level 3 for interviews. If there are only two Proposers in Elevation Level 2, the Selection Committee shall elevate those two Proposers to Elevation Level 3 for interviews. If there is only one Proposer in Elevation Level 2, then the Selection Committee may collectively decide if they would like to elevate the Proposer to Elevation Level 3 for interviews or if they would like to recommend the Board authorize staff to enter into Contract Negotiations with the Proposer. In the latter case, after Board approval to authorize staff to negotiate a contract, the Proposer will then be elevated to Elevation Level 4 for contract negotiations.

Elevation Level 3 (Proposer Interviews)

The Selection Committee are required to conduct interviews of the Proposers that have been elevated from Elevation Level 2 to Elevation Level 3.

During an interview, elevated Proposers may be requested to make a presentation focusing on their qualifications, approach to the project and the ability to furnish the required services. The Selection Committee members will have an opportunity to inquire about any aspect of the RFP and the Proposer's Proposal. After all elevated Proposer interviews, each Selection Committee member will individually rank the Proposers in numerical order beginning at number 1 for the Proposer deemed to be the most highly qualified to perform the required services. In accordance with Section 287.055(4)(b), Florida Statutes, in determining whether a Proposer is qualified, each Selection Committee member shall consider such factors as:

- Ability of Personnel
- Whether a Proposer is a certified minority business enterprise
- Past performance
- Willingness to meet time and budget requirements
- Location
- Recent, current, and projected workloads
- Volume of work previously awarded to each Proposer by the County

Procurement shall receive and compile each Selection Committee member's ranking of each Proposer, and then publish a rank-ordered listing of Proposers to the Selection Committee, based on the combined average rankings given each Proposer. The Selection Committee members will then collectively decide if they would like to recommend the Board, or if applicable the County manager, authorize staff to enter into Contract Negotiations with all Proposers elevated to Proposer Interviews, starting with the highest-ranked Proposer. After Board approval to authorize staff to negotiate a contract, the highest-ranked Proposer will then be elevated to Elevation Level 4, Contract Negotiations.

Elevation Level 4 (Contract Negotiations)

If a Proposer is elevated to this level, the User Division, with the assistance of Procurement and the County Attorney's Office, shall negotiate an Agreement with the elevated Proposer(s) in accordance with Section 287.055(5), Florida Statutes.

If after negotiating for a reasonable time period the parties cannot agree on a contract, the County shall, in its sole discretion, terminate further contract negotiations with that Proposer. Procurement shall notify the Selection Committee that contract negotiations with the elevated Proposer have terminated. The Selection Committee shall then determine whether to recommend to the Board to approve contract negotiations with the next-highest-ranked Proposer, and so on. If the Selection Committee decides not to recommend contract negotiations with the next-highest-ranked Proposer, or if the

County determines there is no other Proposer with whom the County can successfully negotiate a contract, then the RFP Selection Process shall terminate.

After contract negotiations with a Proposer are successfully completed pursuant to Elevation Level 4, the Selection Committee shall recommend to the Board of County Commissioners that it selects such Proposer to provide the services as outlined in the Agreement. The Board of County Commissioners shall make the final decision whether to enter into an Agreement with a Proposer.
